

Sujoy Ghosh

Vice President, India and Asia Pacific

EXPERIENCE

Sujoy Ghosh is the Vice President for First Solar overseeing the company's activities in India and Asia Pacific regions. He has been with First Solar for the past 8 years, and has supervised the build out of the company's India business resulting in an overall installed base of 2GW in India for First Solar's CdTe thin film PV modules. He has also been responsible for executing the company's strategy to develop utility scale solar PV assets and in his tenure the company has created 260MWac of utility scale projects with its own capital as a developer. Besides India, he has been responsible for overseeing First Solar's region operations in the Middle East and more recently in Asia Pacific.

Sujoy has 30 years of industry experience in India, and joined First Solar from GE, where he was the Regional General Manager for GE Energy's Power and Water business. In his 9 years with GE, he has worked in a diverse range of businesses from T&D (SCADA, network management and sub-station automation) to Thermal Power Generation (Gas and Steam Turbine and gasification) to Renewables (Wind). For the last 5 years, he led GE's Thermal Products and Renewable Sales in India/Sri Lanka and Bangladesh.

Prior to joining GE, Sujoy worked for 13 years in Tata Honeywell in sales/market development handling technology platforms from distributed control systems, safety systems and advanced control and optimization packages, across business verticals in the manufacturing, utility and oil & gas verticals.
