INDIA’S ACHIEVEMENTS
India, today is one of the world’s most attractive RE markets, with exponentially increasing demand and proactive policy support, allowing 100% foreign investment through automatic route. Over USD 100 billion investment has already been made, and another USD 30 billion is underway. India’s aim to add 450-500GW RE capacity by 2030, to be bid out by 2028, will need additional USD 80 billion by 2022, up to USD 400 billion by 2030.

RE-INVEST is an established international platform to discuss, explore and accelerate new strategies and efforts to develop and deploy renewables. It will connect the global investor community with stakeholders through a series of seminars, with exhibitions by diverse sectoral players showcasing products, services, manufacturing capabilities, latest technologies and financing opportunities.
